## 2.45GHz Cable Ferrites

Tampa, FL — The introduction and widespread acceptance of Bluetooth and RFID electronics using the 2.45GHz frequency has prompted the development of a complete line of application-specific ferrites.

Leader Tech announces the availability of multiple cable-mounted FerriShield Ferrites that are designed to remove unwanted high-frequency interference signals for applications operating with a peak frequency of 2.45GHz.

The frequency-specific Ferrishield Ferrites are offered in several bisected and solid styles to accommodate most round, flat or bundled cable applications. Free test samples are available.

## About Leader Tech

*Leader Tech is a world-leading innovator and manufacturer of EMI shielding products for circuit boards, electronic enclosures and interconnect cables. The company's core product offerings include standard and custom circuit board shields, beryllium copper fingerstock gaskets, conductive elastomers, advanced RF absorber materials and EMI/RFI ferrites. Leader Tech is a wholly owned subsidiary of HEICO Corporation, a successful and growing technology-driven aerospace, defense and electronics company. HEICO Corporation is a New York Stock Exchange listed company (NYSE: HEI and HEIA) and has been ranked as one of the 200 "Best Small Companies" and 200 "Hot Shot Stocks" by Forbes. For more information, call (813) 855-6921 or visit us on the Web at <http://www.leadertechinc.com>.*
