Leader Tech Announces West Coast Addition

Leader Tech, a world-leading innovator and U.S. manufacturer of EMI shielding products, announces the expansion of its West Coast operations. Alex Cox, the Company's newest Regional Sales Engineer, will lead this effort from his San Francisco Bay Area office.

"The addition of Alex to our team will allow Leader Tech to strengthen existing client relationships and dramatically improve one-on-one engineering support for customers in the Western United States," says Tim Black, Director of Business Development.

Alex brings 15 years of technical sales experience in the electronics industry and has extensive working knowledge of Defense Aerospace, Wireless, RF Microwave, Telecommunication, and Semiconductor applications. Immediately prior to joining Leader Tech, Alex amassed a decade of hands-on experience with a major electronic equipment company. During that tenure, he provided R&D, Electrical, and Design Engineering teams with highly-responsive engineering and customer service support.

"This strategic expansion will allow us to support a notable increase in demand for the company's board, enclosure and cable shielding products. Our initial outreach efforts will be to key accounts in the San Jose and Pacific Northwest regions," says Dario Negrini, President of Leader Tech.
