Alternate Finger (AF) Gasket

Tampa, FL — Leader Tech introduces the newest variation of its Slot Mount shielding and electrical contact gasket. The Company's Alternate Finger (AF) profile is the preferred choice for applications where a continuous slot is not an ideal option. The high-performance beryllium copper fingerstock gasket is manufactured with retention fingers on an alternating pattern that allow the designer greater design flexibility and integrity.

The gasket is available for standard and ultrasoft compression applications. It is also readily available in several plating finishes for optimal galvanic compatibility. The gasket can be ordered in a variety of lengths and retention fingers at every third or fifth slot for maximum installation flexibility. Free samples available.

Leader Tech

Leader Tech is a world-leading innovator and manufacturer of EMI shielding products for circuit boards, electronic enclosures and interconnect cables. The company's core product offerings include standard and custom circuit board shields, beryllium copper fingerstock gaskets, conductive elastomers, advanced RF absorber materials and EMI/RFI ferrites. Leader Tech is a wholly owned subsidiary of HEICO Corporation, a successful and growing technology-driven aerospace, defense and electronics company. HEICO Corporation is a New York Stock Exchange listed company (NYSE: HEI and HEIA) and has been ranked as one of the 200 "Best Small Companies" and 200 "Hot Shot Stocks" by Forbes.
