Dual Protection Gaskets

Tampa, FL — The complex task of protecting sensitive electronics from adverse environmental conditions as well as unwanted electromagnetic interference can often be achieved by integrating a high-performance, conductive gasket into the enclosure package.

Leader Tech's military-grade TechSIL 5000 Conductive Elastomers provide engineers with a highly customizable gasketing solution that offers a shielding effectiveness of up to 110 dB across wide temperature variations and environmental conditions.

The high-performance gasketing material is manufactured using proprietary formulations of both silicone and fluorosilicone rubber that is embedded with highly conductive fillers including: silver plated copper, silver plated aluminum, silver plated glass and nickel coated graphite. The company offers seven standard profiles of TechSIL 5000 gaskets as well as unlimited variations of extruded, molded, sheet stock, and die-cut finishes.

About Leader Tech

Leader Tech is a world-leading innovator and manufacturer of EMI shielding products for circuit boards, electronic enclosures and interconnect cables. The company's core product offerings include standard and custom circuit board shields, beryllium copper fingerstock gaskets, conductive elastomers, advanced RF absorber materials and EMI/RFI ferrites. Leader Tech is a wholly owned subsidiary of HEICO Corporation, a successful and growing technology-driven aerospace, defense and electronics company. HEICO Corporation is a New York Stock Exchange listed company (NYSE: HEI and HELA) and has been ranked as one of the 200 "Best Small Companies" and 200 "Hot Shot Stocks" by Forbes.
