New CBS Manufacturing Process

Tampa, FL — Leader Tech announces the launch of a revolutionary circuit board shielding (CBS) design and manufacturing process. Slot-Lok™, the newest addition to the company's Flex-Tech™ product line, uses standardized manufacturing methods to provide engineers with a new level of circuit board shield design and production flexibility. The proprietary Flex-Tech™ concept has also helped reduce standard industry design-to-delivery lead times from 8 weeks to only 2 weeks.

Slot-Lok™ circuit board shields are made from RoHS compliant materials which exhibit exceptional solder characteristics, corrosion resistance and shielding effectiveness. An added feature of the Slot-Lok™ design is an audible click that confirms secure retention of the CBS cover.

About Leader Tech

Leader Tech is a world-leading innovator and manufacturer of EMI shielding products for circuit boards, electronic enclosures and interconnect cables. The company's core product offerings include standard and custom circuit board shields, beryllium copper fingerstock gaskets, conductive elastomers, advanced RF absorber materials and EMI/RFI ferrites. Leader Tech is a wholly owned subsidiary of HEICO Corporation, a successful and growing technology-driven aerospace, defense and electronics company. HEICO Corporation is a New York Stock Exchange listed company (NYSE: HEI and HEI.A) and has been ranked as one of the 200 "Best Small Companies" and 200 "Hot Shot Stocks" by Forbes.
