RF Shielded Ventilation Panels

Tampa, FL — A major consideration when designing an electronic enclosure is how to control the unwanted release of RF interference through ventilation holes. Leader Tech's complete line of standard and custom manufactured TechVent honeycomb panels is an ideal solution.

TechVent shielding panels are shipped from the factory completely assembled and ready to install. This dramatically reduces OEM manufacturing costs and lead times. The

rigid aluminum vent frame is available in multiple thicknesses and can be specified with captive fasteners or pre-drilled holes to accommodate your specific mounting requirements.

The honeycomb panels are engineered for both indoor and outdoor applications and provide a shielding effectiveness up to 125 dB for E-field and 70 dB for H-field emissions. Multiple finish plating options are also available to enhance shielding effectiveness and environmental protection.

About Leader Tech

Leader Tech is a world-leading innovator and manufacturer of EMI shielding products for circuit boards, electronic enclosures and interconnect cables. The company's core product offerings include standard and custom circuit board shields, beryllium copper fingerstock gaskets, conductive elastomers, advanced RF absorber materials and EMI/RFI ferrites. Leader Tech is a wholly owned subsidiary of HEICO Corporation, a successful and growing technology-driven aerospace, defense and electronics company. HEICO Corporation is a New York Stock Exchange listed company (NYSE: HEI and HELA) and has been ranked as one of the 200 "Best Small Companies" and 200 "Hot Shot Stocks" by Forbes.
