## A Seamless Connection

Tampa, FL —Friday, June 25, 2010—*TechMESH* Knitted Wire gaskets from Leader Tech make reliable electrical contact between parallel metallic surfaces in broad ranging commercial and military-grade electronic enclosures. When installed between gaps, seams and openings the gaskets create a high attenuation EMI shield thereby preventing unwanted interference from leaking into the environment.

*TechMESH* gaskets provide a shielding effectiveness up to 130 dB in the E-Field and up to 80 dB in the H-Field and are available in four standard profiles and 48 different sizes. Each profile can be ordered in either an all mesh or elastomer core configuration.

The Knitted Wire gaskets are available in your choice of three materials, including: Tin Plated Copper Clad Steel, Monel and Aluminum. Additionally, gaskets can be supplied on spools of 25 feet or cut to exact application specifications.

## About Leader Tech

*Leader Tech is a world-leading innovator and manufacturer of EMI shielding products for circuit boards, electronic enclosures and interconnect cables. The company's core product offerings include standard and custom circuit board shields, beryllium copper fingerstock gaskets, conductive elastomers, advanced RF absorber materials and EMI/RFI ferrites. Leader Tech is a wholly owned subsidiary of HEICO Corporation, a successful and growing technology-driven aerospace, defense and electronics company. HEICO Corporation is a New York Stock Exchange listed company (NYSE: HEI and HELA) and has been ranked as one of the 200 "Best Small Companies" and 200 "Hot Shot Stocks" by Forbes. For more information, call (813) 855-6921 or visit us on the Web at <http://www.leadertechinc.com>.*
