

Leader Tech Celebrates Completion of Landmark Expansion

On May 9, 2008 Leader Tech celebrated the completion and grand opening of its Global EMI Shielding Technology Center with local dignitaries, employees, valued customers and special guests. The landmark expansion project was prompted by a significant increase in both domestic and international demand for the company's high-performance EMI Shielding products.

"Every detail of our new one-of-a-kind facility has been tailor-engineered to streamline and improve our customer service, engineering and manufacturing processes" says Dario Negrini, President. "The new expansion encompasses all facets of the business including people, building size and equipment and has drastically increased our productivity and capacity across all three of our core product lines including, board, enclosure and cable shielding."

"From our enhanced engineering department to the optimized placement of every raw material and the implementation of new custom designed equipment, this facility better positions our organization to capture a much larger share of the custom and semi-custom segment of the shielding market" states Mr. Negrini.

In a time when companies are moving away from the EMI Shielding customer through offshore manufacturing and distribution channels, Leader Tech is staying committed to the US market by continuing to expand its industry experienced team, innovative manufacturing technology and US based facility. "As a core value of our company, we believe that customers are better served when they talk directly to a live applications engineer instead of a machine", states Tim Black, Director of Sales and Marketing. "Personalized and responsive support coupled with innovative domestic manufacturing has been and will continue to be the hallmark of Leader Tech's industry-best engineering and customer support departments," Mr. Black continues.

Leader Tech's new Global EMI Shielding Technology Center is located at 12420 Race Track Road Tampa, FL 33626. Several open house tours will be conducted over the next few months. If you would like to schedule your personal tour, please contact our customer service department at 813-855-6921.

About Leader Tech

Leader Tech is a world-leading innovator and manufacturer of EMI shielding products for circuit boards, electronic enclosures and interconnect cables. The company's core product offerings include standard and custom circuit board shields, beryllium copper fingerstock gaskets and custom stampings, conductive elastomers, advanced RF absorber materials and EMI/RFI ferrites. Leader Tech is a wholly owned subsidiary of HEICO Corporation, a successful and growing technology-driven aerospace, defense and electronics company. HEICO Corporation is a New York Stock Exchange listed company (NYSE: HEI and HEI.A) and has been ranked as one of the 200 "Best Small Companies" and 200 "Hot Shot Stocks" by Forbes.
