### Ultra-Thin Ferrite

Tampa, FL —Monday, April 18, 2011—In an effort to accommodate increasing market demand for high-performance emi ferrites that will also fit inside smaller electronic packages, Leader Tech announces the availability of a low-profile, flat cable FerriShield Ferrite. Engineered for SCSI2 and thin flex circuits, this solid ferrite style provides up to 245 ohms of impedance at 100 MHz and can be specified in one of six sizes to accommodate cable widths ranging from 0.50" to 2.00".

With a profile of just .030" and a high-tack, foam adhesive base, the FerriShield SM28R1127-2 can be mounted to almost any surface and even permits a stacking configuration if desired. Additionally, the foam base acts as a shock absorber for applications that experience low to moderate vibration.

### About Leader Tech

*Leader Tech is a world-leading innovator and manufacturer of EMI shielding products for circuit boards, electronic enclosures and interconnect cables. The company's core product offerings include standard and custom circuit board shields, beryllium copper fingerstock gaskets, conductive elastomers, advanced RF absorber materials and EMI/RFI ferrites. Leader Tech is a wholly owned subsidiary of HEICO Corporation, a successful and growing technology-driven aerospace, defense and electronics company. HEICO Corporation is a New York Stock Exchange listed company (NYSE: HEI and HEIA) and has been ranked as one of the 200 "Best Small Companies" and 200 "Hot Shot Stocks" by Forbes. For more information, call (813) 855-6921 or visit us on the Web at <http://www.leadertechinc.com>.*
