Current Shield Weighing You Down? Lighten Up!

Tampa, FL—Monday, March 14, 2011—Market demand for smaller, lighter and faster electronics has forced many engineers to search for innovative methods to control unwanted RF interference and reduce weight at the same time.

One of the easiest ways to achieve these design objectives is to replace existing milled aluminum circuit board covers, also referred to as hogout shields, with a Leader Tech Multi-Cavity CBS or Slot-Lok product.

The Company's newly expanded lines of multi-cavity board-level shielding allow engineers to isolate individual components on the same board with minimal weight and footprint allocations. In addition to offering up to 60 dB of shielding effectiveness (SE), the shields are quickly installed using through-hole or surface mount soldering. The 2-piece fence and removable cover construction also facilitates easy rework and inspection processes.

When compared to similar machined aluminum solutions, Leader Tech Multi-Cavity CBS and Slot-Lok shields dramatically reduce space, weight (up to 25%), assembly cost and time-to-market.

About Leader Tech

Leader Tech is a world-leading innovator and manufacturer of EMI shielding products for circuit boards, electronic enclosures and interconnect cables. The company's core product offerings include standard and custom circuit board shields, beryllium copper fingerstock gaskets, conductive elastomers, advanced RF absorber materials and EMI/RFI ferrites. Leader Tech is a wholly owned subsidiary of HEICO Corporation, a successful and growing technology-driven aerospace, defense and electronics company. HEICO Corporation is a New York Stock Exchange listed company (NYSE: HEI and HEIA) and has been ranked as one of the 200 "Best Small Companies" and 200 "Hot Shot Stocks" by Forbes. For more information, call (813) 855-6921 or visit us on the Web at <http://www.leadertechinc.com>.
