Rapid-Ship Board Level Shields

Tampa, FL —Wednesday, June 15, 2011—Most engineers have experienced seemingly impossible time-to-market demands that are often complicated by compliance testing issues. To help alleviate some of this pressure, Leader Tech announces the introduction of a new SMS Surface Mount Shield series.

The SMS shielding line offers a highly reliable, off-the-shelf solution for most surface-mount applications. These in-stock circuit board shields are offered in both one-piece and two-piece design styles to accommodate broad ranging assembly and rework requirements. Twenty-seven sizes and styles can be shipped for your sample or prototype volume order with 24 hours.

The circuit board shields are manufactured from .01" and .012" tin plated steel, provide a shielding effectiveness up to 60dB and offer cover retention of 1.5-2.5 lb./linear inch in the 2-piece configuration. Standard as well as tape & reel packaging options are available to accommodate your specific manufacturing requirements.

About Leader Tech

Leader Tech is a world-leading innovator and manufacturer of EMI shielding products for circuit boards, electronic enclosures and interconnect cables. The company's core product offerings include standard and custom circuit board shields, beryllium copper fingerstock gaskets, conductive elastomers, advanced RF absorber materials and EMI/RFI ferrites. Leader Tech is a wholly owned subsidiary of HEICO Corporation, a successful and growing technology-driven aerospace, defense and electronics company. HEICO Corporation is a New York Stock Exchange listed company (NYSE: HEI and HEIA) and has been ranked as one of the 200 "Best Small Companies" and 200 "Hot Shot Stocks" by Forbes.
