1. **OUR VISION** *(An aspiration worthy to strive for)*

We are committed to being the most reliable and innovative supplier in the EMI/RFI industry, and as our name implies, the leader. In order to achieve this we will consistently strive to provide you with unparalleled service, innovation, and solutions.

2. **OUR MISSION** *(Our daily commitment to you)*

We are committed to consistently provide you with innovation and flexibility of design. Our engineering expertise and conscientious, outstanding customer service that will provide you with the right product, delivered on time. We are dedicated to making you look good to your customers. We want your repeat business.

3. **OUR PRODUCTS** *(Precision engineered to work in your application)*

We are committed to product excellence. We offer our patented Circuit Board Shields (CBS), an extensive range of copper beryllium (CuBE), a Conductive Elastomer product line, TechVENT Honeycomb Panels, TechMESH knitted mesh, microwave absorbers, and FerriShield Ferrites. Using this diverse product line, Leader Tech is positioned to provide you with a ‘total shielding solution’ for all of your EMI/RFI shielding requirements.

4. **OUR FACILITIES** *(Continually expanding to meet your needs)*

Leader Tech is committed to expansion wherever and whenever necessary. We are constantly expanding our hardware and software capabilities while investing in new equipment to manufacture and deliver the most precise and cost efficient shielding in the industry. Through the continuous support and backing of our parent company HEICO, the possibilities for new space and equipment are an ever-present reality.

5. **OUR SERVICES** *(Consistent reliability each time you order)*

We are committed to excellent service. Our staff undergoes a rigorous daily product, sales, and service training in order to serve you better. We want your calls answered by a person, not a machine, someone trained to qualify your needs and get answers to you when you need them. At Leader Tech we believe that the right people and the right equipment go hand in hand.
# Table of Contents

**CBS Circuit Board Shielding**

- **2** Intro to CBS
- **3** Shielding at the Source

**Standard CBS**

- **4** 10 and 20 Series .......... Shield heights from .130”
- **6** 40 Series ................. Shield heights from .400”
- **8** 50 Series ................. Shield heights from .500”
- **10** 80 Series ............... Shield heights from .800”
- **12** KE Series ............. Offers alternate pin placement across various shield heights
- **14** CBS2 ................... Self-contained, 6-sided enclosure
- **16** Multi-Cavity CBS ...... Isolate multiple components in one shield
- **17** CBS Engineering Notes ... Technical specifications

**Modified CBS**

- **15** Modified CBS .......... Near custom solutions without the cost

**Slot-Lok™ Shields**

- **18** Slot-Lok™ Standard .... Quick-Turn, Near-Custom Shielding
- **19** Slot-Lok™ .............. Enhanced Slot-Lok™ shielding variation
- **20** Low Profile Slot-Lok™ ... Shield heights less than .150”
- **21** Multi-Cavity Slot-Lok™ ... Isolate multiple components in one shield

**Custom Shielding**

- **22** Custom Shielding ...... Unlimited design and production options

**Related Technical Information**

- **23** Packaging and Materials
- **24** Products and Literature
- **25** Global EMI Technology Center
EMI designers demand extremely tight circuit board shields to prevent EMI/RFI radiation and susceptibility. This CBS Circuit Board Shielding Design Guide features multiple design variations of Leader Tech’s patented two-piece construction with a solderable fence and removable cover, considered by designers to have the strongest cover retention in the industry. It provides protection for sensitive components while allowing your technician access to adjust and repair.

Leader Tech provides EMI designers flexibility and cost-effective custom solutions. This is achieved by stocking a large variety of standard “off-the-shelf” fence options, which can be formed and combined with a cover to create a fully custom design. Additional features such as special cutouts, vent holes, insulating materials and other special requirements, can be added to create the right Circuit Board Shield for your application. Avoid long lead-times and expensive custom tooling by reviewing these EMI shielding innovations and selecting the right one for your next application. You will find that Leader Tech’s product diversity includes simple one-piece shields to more complicated multi-cavity shields using a variety of through-hole and surface mounting options.
Leader Tech is not a one-product-fits-all company. We are innovators focused on constant improvement and refinement of proven product platforms and manufacturing methods. This allows us to deliver cost-effective shielding solutions that solve EMI problems for both current and emerging electronic applications.

From small footprints and low-profile applications to multi-level board designs, we offer a wide selection of standard, modified standard and custom board level shielding products to fit your exact specifications.

Four of the Leader Tech’s most popular product lines are described below. Additionally, the product comparison chart allows for “at-a-glance” comparisons of all design options.

### Leader Tech Standard CBS

**Simply one of the best shields ever made.**

Our standard CBS products lead the board-level shielding industry in performance, flexibility and value. The highly reliable 2-piece design (fence and cover) accommodates virtually any through-hole or surface mount application.

### Slot-Lok™ Shields

As close to custom as you can get…without the cost!

Slot-Lok™ shields are designed and manufactured using proprietary methods that increase shield design flexibility while reducing lead time and total product cost. If you need a cost-effective shielding solution with near limitless design flexibility, Slot-Lok™ is the option of choice.

### Multi-Cavity designs

When space, weight and costs are all design priorities.

Our flexible CBS and Slot Lok design and manufacturing processes allow engineers to effectively isolate multiple components using the same shield. The custom designed product typically incorporates multiple internal cavities that share connecting walls and a single cover. This allows for a reduction in shield weight and occupied board space.

### Custom shielding solutions

If you can describe it, we can manufacture it.

Decades of engineering and manufacturing experience provide you with the ultimate board level shielding flexibility. From 3D modeling, material selection and prototyping to high volume production, we are with you every step of the way.

### Notes
- Drawings in figures 1-6 are not to scale; see chart for sizing.
- Standard material: .015” (.38) pre-tin plated steel.
- Other cover heights available, consult factory.
- Standard cover height: .115” (2.92) 10-CBS, .185” (4.70) 20-CBS.
CBS 10 and 20 Series Configuration

**AVAILABLE HEIGHTS:**
10 SERIES: .13" TO 2.0" (3.3 TO 50.8) 20 SERIES: .20" TO 2.0" (5.08 TO 50.8)
Recommended hole size: .050" (1.27)

**Ventilation Patterns**

Single density and double density ventilation holes available upon request.
SV/DV (Standard) = .156" dia.  SV2/DV2 (Alternate) = .08" dia.

**Mounting Hole Patterns (10 and 20 series)**

**205-CBS Foot Pattern**
Pin pattern viewed from top of shield. Consult factory for pin patterns for your application

**10 and 20 Series Specs**
Sizes: .50" x .50" to 12" x 24" (.25" increments)
Shapes: Squares, rectangles and odd shapes in .25" increments
Heights: .13" to 2.00"
Mounting Pins: .50" or 1.00" spacing
Surface Mount: Available for all 10 and 20 series CBS
Std Material: .015" (.38) pre-tin plated steel
Cover Retention: 1.5 - 2.5 lb./linear inch
Shielding Effectiveness: up to 60 dB

**Standard Options**
- Formed fence and cover - unassembled (F)
- Assembled fence and cover (A)
- Flat fence and formed cover (U)
- Pre-tin plated Phos Bronze (F), Alloy 770 (N)
- Ventilation holes (SV 15% or DV 30%)

**Ordering a CBS is Easy**
1. Select your style number - “21-CBS”
2. Choose standard options listed above - “21-CBSFNSV”
3. Specify your width in .25" increments from .50" to 12.00" - “21-CBSFNSV-2.5”
4. Specify your length in .25" increments from .50" to 24.00" - “21-CBSFNSV-2.5x4.5”
5. Specify your height from board to inside cover from .13" to 2.00" “21-CBSFNSV-2.5x4.5x225”

Ventilation Patterns

80 Series Specs
Sizes: .50” x .50” to 12” x 24” (.25” increments)
Shapes: Squares, rectangles and odd shapes in .25” increments
Heights: .80” to 4.00”
Mounting Pins: .25”, .50” or 1.00” spacing
Surface Mount: Available for all 80 series CBS
Std Material: .015” (.38) pre-tin plated steel
Cover Retention: 1.5 - 2.5 lb./linear inch
Shielding Effectiveness: up to 60 dB

Standard Options
• Formed fence and cover - unassembled (F)
• Assembled fence and cover (A)
• Flat fence and formed cover (U)
• Pre-tin plated Phos Bronze (F), Alloy 770 (N)
• Ventilation holes (SV15% or DV30%)
• Dimples for improved retention (D)

Ordering a CBS is Easy
1. Select your style number - “81-CBS”
2. Choose standard options listed above - “81-CBSFNSV”
3. Specify your width in .25” increments from .50” to 12.00” - “81-CBSFNSV-2.5”
4. Specify your length in .25” increments from .50” to 24.00” - “81-CBSFNSV-2.5x4.5”
5. Specify your height from board to inside cover from .80” to 2.00” “81-CBSFNSV-2.5x4.5x.80”

Mounting Hole Patterns (80 series)

.25” Pin Pattern
.50” Pin Pattern
1.0” Pin Pattern

Pin pattern viewed from top of shield. Consult factory for pin patterns for your application.

Engineered 6-sided Shield Enclosure

The versatile 6-sided CBS2 Shielding Box can be mounted on any side or orientation. We recommend the use of GRIP-SERT style threaded inserts. These inserts are completely threaded, enabling them to be utilized both as a method of exterior box attachment and for PCB attachment inside of the shielding box. This allows the use of CBS2 shielding boxes in a wide variety of unique mounting applications.

These highly versatile inserts deliver high torque-out resistance and high pull-out values in our standard .015” pre-tin plated steel or pre-tin plated Phos Bronze (P).

Design

The Leader Tech CBS2 consists of the following:
- (1) fence using proven cover retention fingers on both sides
- (2) covers with height and features to be specified

Standard Modifications Made Easy

Leader Tech understands that not all shielding applications can be satisfied with a standard CBS product. We also recognize that target budgets do not always accommodate a custom shielding solution. The Leader Tech Modified CBS gives you the flexibility to customize a standard CBS shield with significant savings compared to custom alternatives. Our Modified CBS products use existing tooling and manufacturing processes to give you a near-custom shielding solution at a fraction of the cost.

Features/Benefits:
• Short lead time
• Little or no NRE required (tooling cost)
• Surface mount or through-hole design
• Unrestricted perimeter sizes
• Custom shapes to save space - rectangle, “T”, “L”, “Z”
• Multi-cavity design flexibility
• Multiple level design options
• Strong cover retention using patented Leader Tech “fingers”
• Removable cover for access to components
• Grounding gaskets
• I/O holes
• Trace notches
• Connector cutouts
• Enhanced shielding with RF absorbers
• ESD protection with insulator padding

Modified CBS Specs

Material Options
• Alloy 770
• Pre-tin plated Phos Bronze
• Pre-tin plated steel

Plating Options
• Bright tin
• Matte tin
• Tin lead (not RoHS compliant)
• Nickel

Height Options
• .13” to 4.0”

Through-hole Mounting Pins
• .25”, .50” & 1.0” spacing
Multi-Cavity CBS isolate multiple components in one shield

Multi-Cavity Shields Overview

As the complexity of a board’s layout increases so does the need to maintain space, weight and cost control. To satisfy these demanding requirements, Leader Tech offers a cost-effective, multi-cavity version of its standard CBS product line.

Our proprietary multi-cavity manufacturing process gives engineers the flexibility to isolate multiple board-level components using the same shield. The near-custom product uses “off-the-shelf” components to create multiple internal cavities that share connecting walls and a single cover. This allows for a significant reduction in shield weight and allocated board space while maintaining tight cost controls.

In addition to unmatched performance, Leader Tech Multi-Cavity CBS shields also help reduce your final assembly cost and time-to-market. Our shields arrive ready to install for both through-hole and surface mount applications.

Features/Benefits:
- Proven multi-cavity performance
- Minimal NRE
- Short lead time
- Nearly unlimited perimeter sizes
- Surface mount or through-hole design
- Mounting pins at .25”, .50” or 1.0” spacing
- Shape possibilities- rectangle, “T”, “L”, “Z”
- Strong cover retention using patented Leader Tech retention “fingers”
- E-Z pull tabs for removal of cover and access to components
- Multiple level shields
- Welded partitions optional
- Semi-custom shield using standard off-the-shelf features
- Wide range of optional features based on CBS fences
- Reduced cost alternative vs. machined housings
- Consult factory for complete design assistance and engineering support

Multi-Cavity Specs

Material Options
- Alloy 770
- Pre-tin plated Phos Bronze
- Pre-tin plated steel

Plating Options
- Bright tin
- Matte tin
- Tin lead (not RoHS compliant)
- Nickel

Height Options
- .13” to 2.0”

Order Toll-Free 866.TECH.EMI (866.832.4364)  Web LeaderTechInc.com
Overview

- The standard Leader Tech two-piece CBS consists of:
  - (1) Fence- wave, reflow or hand soldered to the PCB
  - (1) Cover- engages retention fingers on top edge of fence
- All dimensions are referenced from where the fence contacts the PCB
- Actual dimensions can be obtained from pin location pattern including material bend allowance (.006” per 90 degree corner in both X & Y axis)
- Recommended solder trace up to .100” wide
- It is advisable to verify pin location pattern with Leader Tech prior to manufacture of PCB to assure lowest cost solution for production of your Board Level Shield
- Pin location patterns provided on request for optimal PCB layout
- Available Materials include:
  - Pre-tin plated steel
  - Phosphorous bronze
  - Nickel silver alloy 770
- Custom shapes and multi-cavity layouts
- Applications engineers are available for design assistance

Minimum Heights for Each Fence Series

- 10 SERIES = .130”(3,30)
- 20 SERIES = .200”(6,60)
- 40 SERIES = .400”(10,16)
- 50 SERIES = .500”(12,70)
- 80 SERIES = .800”(20,32)
- Height is measured from the top of the PCB to the underside of the cover
- Standard heights from .130”(3,3) to 2.00”(50,8)
- By simply changing the cover height, any desired overall height is achievable

Overall Catalog Dimensions for Length and Width

- Standard sizes from .500”(12,7) x .500”(12,7) to 12.00”(304,8) x 24.00” (609,6)
- Minimum pin spacing of .250”(6,35) & minimum pad (surface mount) spacing .500”(12,7)
- Nominal catalog dimensions for length and width based on increments of .250”(6,35). Example: 21- CBSF- 1.25” x 2.75” x .225"
- Other sizes available, please consult a sales engineer for modified standard solutions
- All dimensions referenced here are nominal catalog dimensions

Quick-Turn, Near Custom Shielding Solutions

Slot-Lok™ shields from Leader Tech represent a proprietary manufacturing process that increases shield design flexibility while reducing lead time and total product cost. Slot-Lok™ Circuit Board Shields achieve this by applying standardized manufacturing methods to produce what would traditionally be a custom manufactured product. The proprietary Slot-Lok™ manufacturing process has helped many companies reduce their design-to-delivery time by a factor of four without incurring tooling charges.

An added feature of the Slot-Lok™ design is an audible click that confirms secure retention of the cover.

Features and Benefits

- Lowest cost Slot-Lok™ design
- Shortest lead time
- Custom options available
- Through-hole or surface mount
- Locking & grounding dimples standard
- Automated pick & place option
- Tape & reel packaging option
- RoHS compliant
- Multiple finish plating options
**Slot-Lok™ Configuration**

- **Features and Benefits**
  - Lowest cost Slot-Lok™ design
  - Shortest lead time
  - Custom options available
  - Through-hole or surface mount
  - Locking & grounding dimples standard
  - Automated pick & place option
  - Tape & reel packaging option
  - RoHS compliant
  - Multiple finish plating options

- Nickel

---

When space is tight...we’ve got you covered.

Leader Tech’s Low Profile Slot-Lok™ design is the perfect choice for demanding applications that require a board-level shield, but have a stringent height requirement of less than .150”.

This design variation offers all of the flexibility and benefits of the standard Slot-Lok™ series with a very compact profile. The shields are manufactured using RoHS compliant materials which exhibit exceptional solder characteristics, corrosion resistance and shielding effectiveness.

[Image of Low Profile Slot-Lok™ components]

**Low Profile Slot-Lok™ Features and Benefits**

- Low profile Slot-Lok™ design
- Short lead time
- Through-hole or surface mount
- Tape and reel packaging for automatic placement available
- Ideal for applications with height restrictions under .150”

*Slots on frame to accommodate lower profile*
A Low-Cost, Multi-Cavity Alternative

The proprietary and extremely cost-effective Slot-Lok™ design and manufacturing process can accommodate virtually any multi-cavity shielding application requirement. This circuit board shield uses a flexible manufacturing technology that increases design options while reducing lead time and total product cost.

Multi-Cavity Slot-Lok™ Features and Benefits

- Minimal NRE
- Short lead time
- Surface mount or through-hole design
- Pin pitch matching - to replace existing “legacy” shields
- E-Z pull tabs for ease of cover removal
- Removable cover for access to components
- Cover retention using standard locking and grounding dimples
- Proven multi-cavity performance with interlocking corners
- Multiple level shields

Multi-Cavity / Slot-Lok™ Specs

Sizes: .50” x 12.00”
Shapes: Squares, Rectangles and Odd Shapes
Heights: <.150” to 2.00”
Material Thickness: .010” (.25), .012” (.31) or .015” (.38)
Std Material: Alloy 770
Cover Retention: 1.5 - 2.5 lb./linear inch
Shielding Effectiveness: up to 60 dB

Standard Options

- Welded partitions
- Mouse holes, Notches, ventilation, standoffs
- Welded fence assembly
- Pick & place spot
- Custom packaging: tape & reel, vacuum trays

Material Options

- Pre-tin plated Phos Bronze
- Pre-tin plated steel

Finish Plating Options

- Bright tin
- Matte tin
- Tin lead (not RoHS compliant)
- Nickel
If you can describe it, we can make it! Customs are standard with Leader Tech.

Leader Tech is recognized as a world leader in the design and manufacturing of custom circuit board shields. Our comprehensive, consultative approach provides you with virtually limitless board-level shielding options. Our team involvement starts with your initial design concept and continues through 3D modeling, prototyping, testing, tooling and low- to high-volume manufacturing.

We are pioneers in the development of new and innovative manufacturing techniques and processes. By relying on Leader Tech’s decades of experience, you can develop a custom shielding solution that is manufactured using proven, standardized methods- ultimately lowering your product cost while increasing your flexibility.

Leader Tech Benefits

- Complete design assistance and 3D modeling services
- Engineering assistance on existing “legacy” shields
- Universal tooling and manufacturing experience
- Cost containment options
- Low- and high-volume product capabilities
- Industry-best lead time
- U.S-based manufacturing

The Ultimate Flexibility

- Unlimited shapes & sizes
- Unlimited material options
- Unlimited plating options
- Unlimited height- low to high
- One or two piece design
- Low volume prototype to high volume production
- Welding
- Soldering
- Combination shields
- Custom packaging
- Embossing

ISO 9001: 2008 CERTIFIED

**RoHS COMPLIANT**
### Standard Packaging
All Leader Tech products are packaged and shipped direct from our Florida manufacturing facility. We hand pack all items to ensure the greatest product quality and the most economical shipping cost.

- Hand-packed foam liners with inner cardboard reinforcement - at no extra charge
- Bar coding on every package, including customer part number

### Optional Packaging
Leader Tech can accommodate virtually any packaging request. Some of the most common packaging requests include:
- Tape & Reel packaging
- Vacuum tray
- Customer-specified packaging

### Materials
Below is a list of the most common materials used by Leader Tech to manufacture standard, modified standard and custom circuit board shields.

#### Tin Plated Steel
- Most cost effective option
- Most common material in PCB shielding
- Stocked thicknesses .008, .010, .012 & .015” (other thickness available)
- Bright tin and matte tin standard finish plating
- Highly solderable

#### Nickel Silver Alloy 770
- Copper based alloy
- Common material used in PCB components
- Stocked thicknesses .008”, .010”, .012” & .015”
- Highly solderable
- High corrosion resistance

#### Phosphorous Bronze
- Copper based alloy
- Non-magnetic applications
- Stocked thicknesses .010” & .015”
- Pre-tin plated and unplated available

#### Mu Metal
- For use in low frequency applications
- Non-magnetic applications

#### Other Materials Upon Request
- Copper
- Brass
- BeCu
- Stainless steel
We’ve Got You Covered
Reliable Board, Enclosure and Cable Shielding Solutions

Leader Tech is a world-leading innovator and US-based manufacturer of EMI shielding products for circuit boards, enclosures and cables. In addition to our best selling standard, modified standard and custom CBS shields, Leader Tech offers an expansive line of beryllium copper fingerstock gaskets, conductive elastomers, advanced RF absorber materials and EMI/RFI ferrites.

LeaderTech Shielding Products

Board Level Shielding
- Standard and Multi-Cavity CBS
- Modified Standard Options
- Custom Circuit Board Shields

FerriShield Ferrites
- Snap-On Bisected & Solid Bead Ferrites
- Round & Flat Styles for Cables, Wires and Flex Circuits
- Low, High, Microwave and Wideband Frequency-Specific Material

Enclosure Shielding
- BeCu Fingerstock Gaskets
- TechSIL 5000 Conductive Elastomers
- Conductive Fabric Shielding Gaskets
- TechSIL 8000 Oriented Wire Gaskets
- TechMESH Knitted Wire Gaskets
- TechMESH Combo Strip & Gaskets
- TechVent Honeycomb Shielding Panels

EMI problem?

Leader Tech’s Global EMI Shielding Technology Center located in Tampa, Florida is a one-of-a-kind, innovative manufacturing facility that delivers an unparalleled customer experience while satisfying growing demands for high-quality board, enclosure and cable shielding products.

Every detail of our ultra-modern facility is tailor-engineered to streamline and improve our customer interaction, engineering and manufacturing processes. The Shielding Technology Center encompasses all facets of the business including people, building size and equipment to dramatically improve productivity and capacity across all of our EMI shielding product lines.

From an enhanced engineering department to the optimized placement of every raw material and the deployment of custom designed manufacturing equipment, our facility is uniquely positioned to capture an ever-increasing share of the custom and semi-custom segment within the shielding market.

In a time when companies are moving away from the EMI Shielding customer through offshore manufacturing and distribution channels, Leader Tech is committed to the US market by continuing to expand its industry experienced team, innovative manufacturing technology and US-based headquarters. As a core value of our company, Leader Tech believes that customers are better served when they are able to communicate directly with a live applications engineer instead of a machine or web site. Personalized and responsive support coupled with innovative domestic manufacturing have been and will continue to be the hallmark of Leader Tech’s industry-best engineering and customer support departments.

You’re Invited...

Consider it an open invitation to visit!

As a current or prospective Leader Tech customer you are invited to our beautiful Tampa, Florida headquarters for a personal tour of our facility and manufacturing capabilities.

Please contact your regional sales engineer or our Tampa-based customer service department at 866.832.4364 or 813-855-6921.
